

TotalCount PC Based People Counting System

Multiple Entrance Cabled Version

- * Below is drawn a schematic of a 6 entry system.
- * A multiple entry system can cater for 2 to 250 sensors.
- * This drawing shows PE beam and Reflectors used.
- * See our **Sensors** page on our website for sensors that can be supplied.

- * PC needs spare USB ports
- * Each USB port can handle up to 3 Sensors
- * PC Needs to be turned on and logged on to log the counts as they occur
- * CD Drive usually needed to load Software
- * Suggested installation height of the Sensor and the Reflector is 1.25 metres above the floor level
